to Recovery”*

ASBESTOS, MOLD AND LEAD ABATEMENT— STEPS TO RESTORATION

TIME IS OF THE ESSENCE. YOU NEED TO MOVE QUICKLY TO STALL ANY FURTHER DAMAGE...

When you have **asbestos, mold** or **lead** in your home or business immediate action is required to address the health risks and halt any further contamination.

A call to Reliable Restoration will have our expert professionals at your door to:

- **Quickly assess the damage.**
- **Develop an action plan.**
- **Accurately restore your property to government and industry standards.**

Unlike most of our competitors who use **outside companies** for this type of work, **Reliable Restoration** has its own expertly licensed abatement and remediation team of professionals.

With these simple steps we can have your property ***Reliably Restored.***

RELIABLE RESTORATION-contact us at: www.choosere Reliable.com or (678) 325-1633

Step 1: Call **Reliable Restoration at (678) 325-1633.**

Upon your call to Reliable Restoration, our trained staff will calm your fears and walk you through our process.

Upon arrival we will:

- **Inspect the identified “at-risk” locations.**
- **Collect samples that we will have tested by an independent, third-party laboratory.**
- **Confer with you on our visual observations.**
- **Give you our best projections on the proper methods for abatement.**
- **Target a price for our services.**

Step 2: We Will Develop a Scope of Work for the Abatement

The Reliable Restoration Expert Team is ready to go! As one of only a handful of licensed asbestos abatement companies in the area, Reliable Restoration is an expert at all types of abatement. We can handle projects from simple residential tiles to commercial and industrial applications.

Our Project Scope Development includes:

- **Filing permit applications with the State.**
- **Contracting for special disposal facilities.**
- **Creating a site plan for the secure removal and handling of the contaminated materials.**

NOTE: *In many cases your insurance company may cover some or all of the costs of our services. We will work with you and your insurance company to get the best result for you.*

Step 3: We Will Erect Containment

Any time there is the presence of hazardous materials special care and caution must be exercised before, during and after the removal process.

Proper Containment Means We:

- **Will seal off the entire area to prevent any possible cross-contamination into other areas.** These “cleaning chambers” can only be accessed by licensed, trained personnel wearing special equipment.
- **Special filtering equipment will be placed within the chamber to guarantee that no airborne contaminants can escape.** For everyone’s safety these areas are always clearly marked and secured.
- **Depending on the severity of the mold infestation, additional equipment may be placed both within and outside of the containment to ensure a healthy environment.**

Step 4: We Will Remove the Hazardous Materials

Whether it is asbestos, lead or mold, our staff of professionals will take great care to safely and completely remove the materials from your space. Within this scope there may be other items or materials that must be removed due to their proximity to the danger. We will take care of all of the work needed to put you back in your home or business safely.

Step 5: We Will Prepare Your Property for Reconstruction

Once the abatement is complete, we are going to make sure that everything else is prepared for any needed reconstruction. This can range from simply removing the equipment and cleaning up after ourselves to additional demolition and site work.

Remember, Reliable Restoration is your one-stop source for every step of the process.
