RELIABLE RESTORATION ANNOUNCES STRATEGIC RESPONSE PLAN TO HURRICANE MATTHEW

Reliable Restoration wishes to communicate our heartfelt prayers and provide a Disaster Response Plan outline for those facing Hurricane Matthew's arrival.

Norcross, GA (October 7, 2016) – Reliable Restoration, LLC today announces a strategic Disaster Response Plan to address the potential damage of Hurricane Matthew to our neighbors on the east coast.

As Hurricane Matthew bears down upon the southern US, everyone here at Reliable Restoration sends its best to all those in its path. We hope that the effects of the storm will be short-lived, and we urge everyone to follow the advice of their local professionals to seek shelter and protection.

At Reliable, our primary concern is, and always will be, the safety and security of people. Once the danger passes, we will be prepared to respond quickly, to assess the damage and begin the process of restoring your properties and lives to normal. To that end, we are preparing our response in several ways.

- First, Reliable is coordinating with our **PREP (Priority Response Emergency Program)** clients to maximize our response to their most pressing needs. Similar to "triage," our intent is to identify the most severe damage and tie it to the timeliest response.
- Second, Reliable is staging its **CAT** response equipment and support at our Savannah location. This facility is centrally located within the major storm target area, and gives us the greatest flexibility to be able to assess and respond from North Carolina to central Florida.
- Finally, our staff has been trained for this exact scenario and we will be there to provide support, comfort and promise in the face of potential devastation.

Once again, we hold out hope for minimal impact and disruption for the millions of people in Hurricane Matthew's path. Should you require our services, please do not hesitate to call **Reliable Restoration at (678) 325-1633**.
